

## February 2020 Newsletter Recap on October 2019 Convention:

We are so pleased with how many people were able to attend the conference this past year. Not only did we hear from some great leaders in the profession, we were able to hone in on how to survive an audit, how to defend a case in court, new and leading technology available to chiropractors as well as catch up with our friends in various states. Here are a few pictures below. Thank you to all who made it out. We look forward to seeing you all this October.

**Many thanks in collaborative efforts with the West Hartford Group and the ACCC for helping to create such an incredible continuing education event.**

**Attention members:** If you have any interesting cases, please summarize them into a one page synopsis and we can include them in upcoming newsletters.

## How is your Chiropractic Heart Health?

**February is known for heart awareness. Here are some recent stroke cases**

**to be familiar with:** When was the last time you took a clinical coronary related continuing education? Adverse heart and blood vessel ruptures are the cause for many malpractice cases in chiropractic care. If you are at all considering getting the diplomate in Forensics through the new program which includes many amazing online learning opportunities, this is one area to be ready to take an opinion on. If many of you recall, there was a recent celebrity case of a stroke caused by a chiropractic adjustment which has undergone extensive malpractice litigation in regards to Katy May. According to a publication by ABC News- it is titled "Model Died After Chiropractic Procedure" and can be found here: <https://abcnews.go.com/US/officials-model-died-chiropractic-procedure/story?id=42955934>

The Media is not nice to the chiropractic profession in general. Thankfully, NCMIC has a great resource on a case study where a doctor did end up settling for \$1 MILLION for a coronary event in a patient. Click the link to read it: [Don't Mistake Coronary Symptoms!](#) **Don't stop here, continue to get informed. This is a recent research article indicating that cervical manipulation can be correlated to vertebral artery dissections.**

### Recap of ACA Engage 2020

President, Michael W. Mathesie participated with a Florida Delegation visiting House of Representatives in Washington, DC at Engage 2020, communicating the need to pass HR 3654.

Do you know somebody who is interested in learning how to be a member of the CFS?

Share this link with them to help better the profession one chiropractor at a time.
